January 27, 1988

Confirmation of Reception:

Mr Heinen,

This is to confirm your reception of the KVEE AM signal on January 10, 1988 between the time of 11:56PM and 12:06PM. Sign off is of course at 12:07PM.

A little about the station. We first appeared on the air as KFXJ about 75 Years ago on 920 KHz. In about 1950 the Call Letters changed to KREX. About 1960 We changed power from 1000 watts to what we now operate (50,000 Watts) and a new frequency of 1100 Khz. In 1984 We changed call letters again to KIIO and In 1987 We Decided to change to the same call as our FM sister station (KVEE) or V-FM. We are Directional at night with reduced power to (10,000 Watts) The main signal path is from North to south. The east and west signals are attenuated. I would say that your reception of KVEE from the eastern slope to be quite an accomplishment.

Congratulations

Jim Lucas
Chief Operator
