

Dear Wayne,

TX For QSL on my MEDFER  
BEACON on 1675KHZ (D) is the  
ID NOT T-e-e Hi.

Antenna is Bottom Loaded and it is 10'  
tall with 4 foot top hat. Power is  
The legal 100 milliwatts. I have a  
Home Brew VFO AND should get it KTAL  
Controlled someday. I generally  
Run it from 10Pm → 7Am local time.

I wish I could get more interest  
in the surrounding STATES.

Thanks for the letter, The (Ti)  
Beacon which is very slow CW  
comes in every night out of Kingman, AZ  
and is the Power house Beacon which  
is heard in Hawaii. And East Coast,

73 Bill

P.S. THESE MEDFER QSL RATHER THAN  
Some DX CARD
