

KDEC

1240 KC

Scenic Broadcasting Company, Inc.

Dial: 382-4251

DECORAH, IOWA 52101

308½ West Water Street

July 24, 1965

Dear Mr. Heinen;

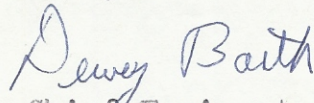

Thank you very much for your letter. Our station was on the air from 0115 to 0128 Central Daylight Time. We were modulating with a 1000 cycle tone with station identification approximately every 30 seconds. The date was July 4, 1965.

KDEC was in the process of constructing new transmitter, antenna, and studio facilities and our purpose of being on the air was for a frequency measurement.

KDEC operates on a frequency of 1240 KC with a power of 1000 watts daytime and 250 watts night time. Enclosed you will find a map of our coverage area which also lists other information of our service area.

I am sorry that I was unable to answer this letter sooner, but it got misplaced while we were moving to our new studios. Once again thanking you very much for your letter

Dewey Barth

Chief Engineer
KDEC Decorah, Iowa
