Dear Wayne,

This is to confirm your signal report of our station KWIK. We're out of bumper stickers, the perennial favorite for SWLS so I'm enclosing some station info in hopes that it will suffice.

KWIK is one of the oldest AM stations in Idaho. We own the oldest in Idaho as well, KID AM 590 in Idaho Falls. It was originally located in an old bank building (we still occupy) with the transmitter located in the basement and the tower on the roof of the building.

In mid-60s when rudimentary bank computers went into service close-by the RF from the short tower caused too much interference and the site was moved to the City of Chubbuck, Idaho about 6 miles north of here. In 1975 it moved to its present location on Whittaker Road in Chubbuck, Idaho.

The facilities consist of a 2-year old Broadcast Electronics (BE) model AM 1 A solid-state transmitter that isn't much larger than an Alfa or Henry Ham amp. We used an Orban/CRL 9200 audio processor. The station gets its range for a full 1/4 wave 199' Rohn 25 G tower over a marshy area fed by the underflow from the Portneuf River and American Falls Reservoir so we have a natural ground plane.

Thank you for listening and I hope you can receive KID AM (5 KW Day - 1 KW Night on 590 Khz.) once we complete the ground system renovation this fall.

Best 73s & Good DX
