"...the home of the good guys."

16 December 1965

Dear Mr. Heinen:

This letter is to verify your report of reception of our frequency check of 1580 kc on 11 December of this year. We are always happy to hear reports of reception of this check. Generally, we have a code word which we require to be included in any verification requests, however, on this particular check the code word was not used.

WKID is located on the east edge of Urbana. Our transmitter and studios are in the same building. Our tower is a 300' guyed structure of triangular cross section. Our transmitter and audio equipment is all of Gates manufacture except for our tape recorders.

Again, it was nice hearing from you and good luck in your DX collecting. We have added your letter to the many others we have received from all the states in the union except for those on the west coast.

George P. Scharf
Chief Engineer
