

January 18, 1990

Mr. Wayne Heinen  
4131 S. Andes Way  
Aurora, Co. 80013

Mr. Heinen:

This letter will serve to confirm your reception report of January 15, 1990, of KABI-AM at 1560 KHZ. Your reports of hearing Moody Blues music and KABI I.D.'s is correct.

Your reports of 4:30 AM/4:34 AM & 4:38 AM were with KABI at 250 watts. Report at 4:44 AM was at 142 watts. And, up to 4:52 was with a power of only 20 watts !!

You are the first NRC member I have confirmed reception for on the above test date.

As a ham radio operator I have worked over a dozen states with less than 1 watt of power. Albeit, CW is much easier to DX than A3.

Best regards,

E. Joe Eck, AIØA  
Chief Engineer
