Dear Mr. Heinen:

We are pleased to acknowledge receipt of your report of
April 16, 1978 from 2106 through 2112 C.S.T.
at which time you quite accurately logged programming
from K S A L.

North

K S A L operates with a full time power output of 5,000
watts, using non-directional antenna days and a four
element directional array nights. Normal hours of
operation are from 0530 through 2400 C.S.T. week days
and starting at 0655 on Sundays.

K S A L first went on the air May 28, 1937 with 100
watts of power, later increased to 250 watts, then
1000/500, then 1000 watts and full 5,000 watts in
April of 1949.

Here's hoping you have many interesting hours DXing
on the radio waves.
