October 15, 1976

Dear Sir,

This is to confirm your report of reception of WREN on October 9, 1976. The report is as accurate as you received it. There is a point that I would like to make concerning the verification data (program details) that you used. No station keeps a record of the music played and/or artists, unless they happen to subscribe to a catalog format service or are in the BMI or ASCAP verification week.

Use of song titles and artists will not help at all for verifying a reception of a station. The things that can be checked on the program log, are the things that you should use to insure verification. These are; commercials, network programs (news, comentary, etc), Public Service Annouhcements, political announcements, special remote broadcasts, etc. These can be checked very easily and will assure confirmation.

You think that you a sea lousy typist...it's your machine.. like mine, it cant spell.

Have fun,

Lee
Lee Yazell, Chief Engineer
