

WRYT / 950
BOSTON

3 February, 1967

Dear DX'er,

Please accept this letter as verification for your reception of WRYT's Special DX Test for the National Radio Club on 26 December, 1966.

We received 58 reception reports from 17 states and 2 Canadian provinces. Farthest DX reception was from Cupertino, California.

WRYT, formerly WORL, is owned and operated by the Pilgrim Broadcasting Company, part of Atlantic States Industries, which also owns WTSA-1450 in Brattleboro, Vt., WLOB-1310 in Portland, Me., and WNVY-1230 in Pensacola, Fla. WRYT operates daytime only with a power output of 5,000 watts Non-directional, with our transmitter located in Saugus, Massachusetts.

We were most happy to conduct this equipment test for the NRC, and I hope to be on the air again soon for another DX Test. Give my regards to Howie Lapidés (Jay Richards) when you see him. Geoff Fox (NRC, IRCA)

73 and good listening,

Peter J. Gowen

Chief Engineer
