Dear Wayne:

Thank you for your reception report of station CHSM at 05.32 - 05.35 CST on October 2, 1989. We were very interested to receive this report. It was on this date that we were measuring our omni - directional pattern in preparation for our Supplementary Proof of Performance to be submitted to the Department of Communications for licence renewal. This occurs only once in five years - and only for about six hours. We will be committed to abide by our directional pattern limits until this proof is required again. Congratulations!

CHSM broadcasts on 1250 kHz at 10 kwatts 24 hours a day. The transmitter is a Continental Electronics 316F and is located near St. Pierre, Manitoba (50 kms SE of Winnipeg). It operates into a four tower array. CHSM is one of four stations that make up Radio Southern Manitoba. The other three stations are CFAM, 950 kHz and CJRB, 1220 kHz and CKMW, 1570 kHz.

Radio Southern Manitoba is owned and operated by Golden West Broadcasting Ltd who have their head offices in Altona, MB.

Thank you again for your letter and we wish you continued success in listening to distant stations. Perhaps you will have opportunity to listen to some of our other stations.

Sincerely,

Ed Siemens
Engineering Department
