Wayne Heinen
Colorado Springs CO

Dear Wayne:

We will be glad to go on the air March 19 at 2:00 a.m. e.s.t. The chief engineer said by all means we will conduct a test at the time. On the same night I heard from you, I also heard from Scarbrough Mane and Seattle Washington. Enclosed is a coverage map of our daytime signal. As you see we cover a great deal of Michigan. Our E.R.P. in the major lobe is 55,000 watts and goes right up the east coast of the state. The null of course is towards Philadelphia. Thanks for the letter, Wayne, and I am looking forward to our test on the 19th.

Sincerley,

Randall E. Bhirdo
