1-31-81

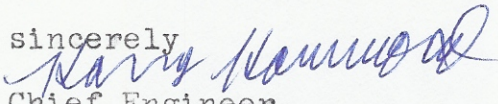

Wayne Heinen
427 E. Caramillo St.
Colorado Springs, Co 80907

Dear Wayne

It appears that your reception report checks with programing for KBRF, so am able to verify.

KBRF AM uses a power daytime of 5000 watts with two tower directional pattern, with only minor minimums in a couple of directions, and a nighttime power of 1000 watts with three tower array with several deep nulls, with major lobes to the SW-NE-NW-SE.

KBRF is one of the oldest stations in the State of Minn. and has gone through several call changes over the years due to changes in ownership, and moving from 1230 to 1250 KHZ.

sincerely,

Chief Engineer
