Dear Wayne:

Better late than never, I hope! I found your letter in a stack of papers today, and I'm please to verify your reception report of 10-15-96.

KAAN operates with a daytime-only power of 1000W, using a Harris SX-1 transmitter shunt-feeding a 348-foot tower.

Again, thanks for your report.

Sincerely,

Gregg Richwine

Colorado Springs, Col. 80904

Dear Wayne:

It was interesting to receive your reception report. The description of programming you heard on KAYQ on December 27th was adequate enough for us to be able to confirm that you were certainly listening to our station.

Eventhough our signal is directional with most of the energy directional westward, it is quite unusual that you would receive our 250 watt night-time signal. Incidentally, we are 1,000 watts non-directional daytime.

Up until recently, KAYQ was a sister station to KLAK in Denver. Now we are owned by the Coleman American Company, here in Kansas City.

Thank you for taking the time to write and let us know of your KAYQ reception. Best of luck in your 1976 DX'ing.

Sincerely,

Benton Weiss

Dear Wayne,

I am very pleased to verify your reception of KBEQ-AM on November 18th. I'm afraid we don't have any QSL cards printed so I've sent along a couple of bumper stickers.

As you may have determined by the dual ID, KBEQ-AM is simulcast with KBEQ-FM which operates at 104.3 MHz with 100 kW ERP. KBEQ-AM is 1 kW day and 500 W night with a three tower array for both the day and night patterns. The main lobe of the groundwave is at a bearing of 212° from the tower site in Blue Springs, MO. The main transmitter is a 1983 model Harris SX-1 which feeds a 1983 Harris Phasor.

Happy DXing,

R. Lee Wheeler
Chief Engineer

Dear Wayne,

I am pleased to verify your reception report of KBZR dated October 2, 1989.

KBZR went on the air in February, 1984 as KBSM and was owned by Mr. Dean Lupkey. The original format was a sort of light rock / adult contemporary mish mash. In 1985 the station changed to a oldies format and was called K-BEST 1030. After a myriad of financial problems the Bank of Jacomo was granted control of the property in 1987. The calls were changed to KKJC and the station was satellite programmed through the Transtar Radio Network with another adult contemporary service. In 1988 the Noble Broadcast Group, the licensee of KBEQ FM in Kansas City, purchased the assets of KKJC from the bank and the bank took the station dark until the transfer was approved by the FCC. In April of 1988 the transfer was approved and the facility was turned back on as KBEQ AM and simulcast the programming of Q-104. On July 1st, 1989 the calls were again changed to KBZR and, as you heard, we became an affiliate of the Z-ROCK network.

KBZR is a 1 kW day, 500 W night facility and is directional both day and night. The main lobe of the signal bears 212 degrees from true north and has a real serious null to the east to protect WBZ in Boston. The main transmitter is a Harris SX-1 and we recently upgraded the signal processing to conform with the NRSC standards.

Enclosed is an official KBZR bumper sticker and a Z-ROCK pin, enjoy.

3-27-89

Dear Wayne:

Thanks for reporting the reception of KCCV on March 16, 1989. During my 4 years as chief engineer of the radio station, this is the farthest report from the west that I have received. As you can see from the enclosed coverage map, our pattern is a north to south oval and does not extend very far east or west.

It is always a pleasure hearing from DX'ers. I find it very interesting how far we get out and without feedback from people like yourself we wouldn't know. Keep up the good work.

Sincerely,

Ed Treese

REO

The Easy Music of Kansas City

October 7, 1993

Mr. Wayne Heinen
4131 S. Andes Way
Aurora, Colorado 80013-3831

Dear Wayne:

What a surprise to receive your report and learn you are hearing KFEZ as far away as Aurora, Colorado. KFEZ is 5,000 watts non-directional in the daytime, 1,000 watts critical time (two hours after sunrise and two hours before sunset) and 250 watts directional at night towards the west. For you to hear a 250 watt station at night with directional antenna is incredible.

We use six antenna at night, which are located east of Downtown Kansas City. We only cover only the urban part of the city at night.

KFEZ was formerly KJLA (call letters were changed October 15, 1992), and went dark in June of 1990. I bought the station after it had been off the air 15 months, and returned it to the air August 28, 1991.

The station KRDS in Tolleson, Arizona is 5 KW-D, 250 W at N, DA-2. The station on 1190 in Dallas is 50 KW-D 5 KW Night, DA-2. I think DA-2 means directional antenna both day and night.

You are correct in program details. We are an "Easy Listening" music station, 24 hours, and our handle is "1190 Easy". You are also correct that our weather is at the bottom of the hour, and we resume our "Easy Music" after the weather. Enclosed is a brochure about KFEZ.

I regret your earlier report did not get answered. It is not like our staff to be remiss in answering correspondence.

Please tune us in again and let me know how we are doing.

Warmest regards,

Thomas E. Beal
President and General Manager

Dear Wayne:

Certainly, I am pleased to confirm your reception of KJLA Radio on February 13, 1979.

The description you gave of the programming format was quite adequate to assure that you were, in fact, listening to our station.

During the daytime hours, KJLA operates with 1000 watts of power and at night with 250 watts and a six tower directional antenna system. When we are on night power and patten we send a minimum amount of signal to the northeast and a maximum to the west.

Thank you for writing and good luck as you listen.

Sincerely,

OSBORN COMMUNICATIONS CORPORATION

TO: KMBZ
Kansas City, Mo.

Dear Sir,

I am very pleased to report reception of KMBZ on
October 9, 1976 from 8:27P CLT to 8:33P CLT on your assigned frequency
of 980 kHz. Your signal strength was Vry Good.

There are three reasons for this form report. 1. I am
a lousy typist. 2. I usually forget to give the station some info of
value. 3. My handwriting is worse than most Doctors! I hope you will
still consider this report valuable.

The following are the program details which I would
like to offer as proof of my reception:

- 8:27p Song-Let Me Down Easy
- 8:29p Time Check & Cop's Carpet Company commercial
- 8:30p Sports scores..then Promo KMBZ Daily Double Contest...
Short Spot for "Vineyard Town Homes" in Blue Springs
- 8:31 Education News with report on Shawnee Mission Schools Career
Day call 262-7677 for more Education News
- 8:32p Twin City Bank presents KU Football Locker Room. then interview
with KU Coach
- 8:33p Commercial Twin City Bank and more music....

For your information I use a World War II surplus
NAVY receiver with a 4' loop antenna. This antenna is directional and
was specially designed for Broadcast Band reception by a member of the
NRC. I am located on the near east side of Colorado Springs about 20
miles from Pikes Peak.

I am enclosing return postage to facilitate your
reply. If my report is found to be correct I'd appreciate a verification
letter or card for my collection.

Thanking you in advance for your kindness...

Sincerely,

Wayne Heinen

NEWS TALK AM 1260 KSGF

November 14, 2002

Mr. Wayne Heinen –NOPOH
4131 S. Andes Way
Aurora, CO 80013-3831

Mr. Heinen,

Thank you for your letter and report of reception of “KTTF” on November 8, 2002.

I am writing to confirm your reception of our station ... and to let you know we are now News Talk 1260, KSGF. We applied and received approval for our call letter change a couple of months ago ... and we do, indeed, broadcast on 1260 kHz from our transmitter here in Springfield.

Originally KTTS AM, with a long-time country music format and roots that go back to 1926, the station evolved to a *classic* country format in the 90's. On September 10, 2001 (note the date), KTTS became KTTF AM – to delineate further from our sister station, KTTS FM – and switched to a hybrid 50/50 news talk/classic country format. After 10 months of fine tuning, News Talk 1260, KSGF, emerged with a 24-hour news format, featuring both local and syndicated news and talk shows, including Neal Boortz, Bill O'Reilly, Sean Hannity, Rusty Humphries, Michael Savage, Clark Howard and Dave Ramsey.

It's always nice to hear from DXers ... if only for the novelty factor. I appreciate your letter and extend an invitation to visit our studios if you're ever in the Springfield area.

Sincerely,

Dave Hayes
Program Director

Dear Wayne,

It's our pleasure to confirm your reception of KUSA on October 8, 1984 from 2:35 to 2:50 AM CDT.

We are a four tower directional at night and non-directional day with 5000 Watts 24 hours a day. We are owned by the Gannett Company which also owns KUSA-TV in Denver with which you are no doubt familiar. They own a total of six TV stations and fourteen radio stations, and subject to FCC approval are purchasing two stations in Houston. So they are becoming one of the giants in broadcasting as they already are in newspapers.

KUSA is the only AM station in St. Louis broadcasting in stereo and are using the Motorola C-Quam system.

We appreciate your letter and wish you continuing success in your hobby.

Very truly yours,

Bill R. Schmidt
Bill R. Schmidt
Engineering Supervisor

P.S. From watching part of the football game from Denver last night on TV, it looks as if winter has arrived there.

CARROLLTON

January 28, 1998

Dear Wayne

Thank you very much for your letter of January 17. I please to hear that you could pick up, in the beautiful state of Colorado. Denver is a great pleace to live with the ROCKY MOUNTAIN. I go to Denver ever year for a vaction! I wish I could fine a radio job there. We go to 50,000 Watts at 7;30 am in January and February at 7:15 am. And at night we go Directional with 5KW at 5;15pm in January and February 6;00pm. I am confirming, that you pick us up on January 17, 1998 at 810 KHZ at 7;29 am to 7;32 am. Will again thanks for listening.

Sincerely

A handwritten signature in blue ink that reads "Larry Timmons".

Larry Timmons

Chief Engineer.
