

May 26, 1987

Dear Dx'er,

We appreciate your interest in KATL! Our format is adult contemporary. In August 1985 we changed from 1340 to 770 kHz and broadcast at 10,000 watts daylight power and 1,000 watts directional North/Northwest night time power.

KATL is "Your Friend in Eastern Montana!" The area we serve is basically agricultural. Travelers on Interstate 94 should be able to receive our signal for over two hundred miles of their journey.

I am enclosing some information from the station.

This is verification that the information you noted agrees with our programming log. The signal you received was KATL in Miles City, Montana.

Sincerely,

A handwritten signature in blue ink that reads "Shirley Lawrence". The signature is written in a cursive style.
