Dear Mr. Heinen,

Congratulations! You have accomplished listening to our station on two different frequencies at two different times!

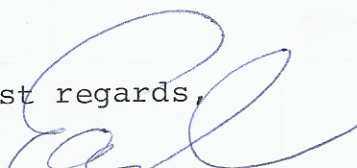

On the morning of November 24, 1990 on 1360 Khz, and again in the evening of November 29th, 1991 on 660 Khz!

Perhaps, no-one else will be able to claim this type of verification, at least we haven't heard from anyone who would qualify.

KEYZ broadcast on 1360 Khz for several years after moving from 1480 Khz in the 1950's. Then, we moved to our new 660 Khz in February of this year. Details of your letter confirm your reception of KEYZ on these two frequencies.

So, show this one off to your other club members, Wayne! And, thanks for tuning in!

Best regards,

Earl R. Gross, engineer
