Aug. 15, 1978

Dear Sir:

This is to confirm your reception report of KQWB-AM on May 8, 1978, from 01:20 to 01:31. Your program information was correct.

KQWB has been a daytime station on 1550 kHz. since 1960 and in April 1978 we began operation fulltime with our five tower nighttime antenna system with five kilowatts input to the system. All radiated power is beamed to the west in a arc about 120° wide. Our daytime antenna consists of a single ¼ wave stick non-directional with five kilowatts.

We would like to know if you are able to receive our station often there at night?

Yours truly,

A handwritten signature in blue ink that reads 'Curt Peterson'.

Curt Peterson  
Chief Engineer
