April 18, 1966

Dear Mr. Heiner:

Your report is verified. The night or morning of April 9, W W N H was conducting a proof of performance test. W W N H is 5,000 watts full-time. W W N H is directional during nite-time hours. We protect W B E N and a station in New-fundland. W W N H puts out a figure 8 pattern with emphasis on north and south. The morning you were monitoring, W W N H was non-directional.

I have enclosed one of our safety bumper stickers.

Thank you for your report.

John Chiel
Senior Engineer

The Most Powerful Independent Station North of Boston

Date 14 April 1968
