Wayne Heinen
4131 S. Andes Way
Aurora, CO 80013-3831

Dear Wayne,

This letter confirms your reception of station KNML (AM) 610 kHz at approximately 8:36pm - 9:01pm Mountain Time on October 4th, 2002. The program description you provide in your reception report has been confirmed to be correct.

KNML operates with 5,000 watts day and night. At night a three-tower directional antenna is employed which beams the power mostly to the north and south in a figure-8.

KNML doesn't have any QSL cards per se, so I hope this confirmation letter will be useful to you.

Best of luck to you -- and good DX!

Sincerely,

Mike Langner
Chief Engineer
