

## VERIFICATION OF RECEPTION

### North Las Vegas, Nevada

Congratulations Mr. Heinen, your reception report of: 7/23/2004, has been verified accurate.

KXNT operates on 840 KHz with a Daytime power of 50,000 Watts and a Nighttime power of 25 Kilowatts. KXNT uses the same directional pattern day and night. The KXNT antenna system consists of 4 towers in a parallelogram configuration. KXNT uses a Harris DX-50 digitally modulated transmitter.

The KXNT transmitter is located approximately 25 Miles North North-West of Las Vegas in Apex, Nevada.

The KXNT studios are located in Las Vegas at 6655 W. Sahara #D-110, Las Vegas, Nevada 89102 U.S.A.

This is an "Extra Special" catch, as KXNT is operating on special temporary authority at a power reduction of approximately 3Db, because of power distribution towers built in the near field of the antenna array.

My name is Tracy Teagarden; I am the Chief Engineer of the Infinity Radio, Las Vegas stations. I hold my Bachelors in Electrical Engineering from Ohio University have a staff of three engineers to maintain our 6 stations.

All the best and happy Dxing!

Tracy Teagarden,  
Chief Engineer
