Fax 405-772-1590

Dear Mr. Heinen,

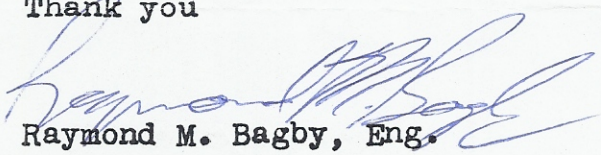

Please forgive my lack of attention to this matter, it is inexcusable that you should have to wait more than a year for a reply from this station.

It was indeed KWEY AM 1590cps you received 11/11/91 from 12:31am to 12:51am.

We were broadcasting at a power of 1Kw using a two tower directional array with two nulls, one at 2 degrees and the other at 76 degrees. Our minor rear lobe is at 39 degrees and the main lobe is to the S.W. Our transmitter is the Harris SX-1 into a Harris/Gates phasor and A.T.U.s.

Again please excuse the delay of our reply.

Thank you

Raymond M. Bagby, Eng.
