

WIP Radio

19TH & WALNUT STREETS, PHILADELPHIA 3, PENNSYLVANIA, LOCUST 8-2900 A METROPOLITAN BROADCASTING STATION

November 9, 1965

Mr. Wayne Heinen
126 Linwood Avenue
Orchard Park, N. Y. 14127

Dear Mr. Heinen:

Thank you very much for your request for verification of reception of Radio Station WIP. Your listener report has been checked against our Program Log and found to be accurate.

This letter is official verification that you have listened to WIP for a sufficient period of time to make a positive identification.

You may be interested in the following technical information concerning our operation:

TRANSMITTERS: Main, RCA Type BTA-5H, 5KW.
Alternate Main, Western Electric Type 405B-1, 5KW.

ANTENNA SYSTEM: 2 Self supporting, tapered, square cross section towers. Spacing between towers, 810 feet. Height of towers, 275 feet with a 30 foot top-loading crown on each. Towers are series excited in phase.

LOCATION: Bellmawr, New Jersey. $39^{\circ}51'56''$ North, $75^{\circ}06'43''$ West.

WIP operates full time, with the same pattern day and night.

We are always happy to receive listener reports and depend upon them to some degree to evaluate our performance. Thanks again, and good luck with your DX listening.

Sincerely,

C. D. Dengate

C. D. Dengate
Chief Engineer
