March 17, 1966

Mr. Wayne Heinen
126 Linwood Avenue
Orchard Park,
New York

Dear Sir:

Thank you for your letter of March 13, 1966. This is to confirm your report concerning reception of this station. The information contained in your report is accurate according to our schedule.

We use a Gates BC 250 GY transmitter into a non-directional antenna 240 feet high.

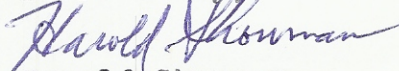

Tape playback equipment includes two Ampex recorders as well as two Collins ATC units.

WVSC-FM will be on the air soon. In fact, we moved the transmitter into position yesterday. Next comes the testing and then "on the air". Approximately one month from now, it will be ready to go.

The 5 kw am will go on the air later this year. NW/SE direction. Thanks for your report and we hope the big transmitter will be much more potent. By the way, our FM frequency will be 97.7 mc.

All the best to you and keep listening.

Yours truly,

Harold Showman
Engineer
Amateur Radio W3PVG
