November 5, 2002

Dear Wayne,

I can attest to the fact that you did in deed hear KCLE 1140 Khz out of Cleburne, Texas on November 1, 2002. We were broadcasting a local football game in a city just to the north of Cleburne named Burleson. KCLE has been on the air since September of 1947 first operating on 1120 Khz, then in the year 2001, we changed frequencies over to 1140 Khz which we operate on today. We are a (5) tower directional day (4) tower directional night station with 710 watts at night. Enclosed are a couple of our bumper stickers. Thanks for DX'ing and keep listening!

Sincerely,

Gary L. Moss
President, M&M Broadcasters
KCLE/KTFW/KWOW
