March 21, 2003

Mr. Heinen,

Thanks you for your letter concerning the reception of KEAN-AM. I am very surprised that you were able to receive the station since we are currently running at a greatly reduced power of 250 watts omni-directional. At night we normally operate at 1000 watts with a directional pattern that is partly aimed somewhat in your direction. Your information is correct in your proof of reception. I have enclosed some bumper stickers from some of our stations. Unfortunately we do not have any for KEAN-AM.

Thank you for your information on the reception of KEAN.

Sincerely,

A handwritten signature in dark ink that reads "Gary Smith". The signature is written in a cursive style with a large, sweeping initial "G".

Gary Smith
Chief Engineer
Clear Channel-KEAN
