January 21, 1980

Mr Wayne Heinen  
427 E Caramillo St.  
Colorado Springs, CO. 80907

Dear Wayne:

I am very happy to verify your reception report of KENR 1070 on January 14. After checking our program logs and transmitter logs I find your information was true and accurate.

Here is a little information about KENR. We operate with 10KW days and 5KW nighttime using a 9 tower directional antenna system. Our transmitter is located north of Houston and our signal is transmitted almost totally to the south. We just installed a new HARRIS MW-10 transmitter on September 1, 1979. I am enclosing a xerox copy of our pattern from our antenna proof for your information. As you can see we radiate almost no signal towards your area.

Thanks a bunch for the DX report. The jocks always like to know that they can be heard far away.

Sincerely,

A handwritten signature in green ink that appears to read "Ron Haney".

Ron Haney  
chief engineer  
KENR/KRBE

P.S. The announcer you heard on 1/14 was Howard Reynolds (not Howard Inness). It was his first night on KENR. He was happy to get the report, too.
