4131 S. Andes Way
Aurora, Colorado 80013-3831

Dear Wayne,

Thank you for your DX report on KRQX - AM. We are a 5000 Watt directional station on 570 KHz, and our transmitters are located in Coppel, Texas about 3 miles Northeast of Dallas / Fort Worth Airport. We are currently running with two matched Collins 820-E transmitters, one main and one backup. Our antenna system consists of three four-foot face, three-sided, 490-foot, top-loaded towers; this array provides two different directional patterns, one day and one night. We are also equipped with a Cummins Diesel, 250 Kilowatt power generator to provide service during commercial power loss. Our programming is twenty four hours a day of "Classic Rock and Roll" in Motorola C-Quam Stereo, delivered from our studios via a Moseley Associates PCL-606 Composite Studio to Transmitter Link.

We also have an FM stereo station at 97.9 MHz. KZEW operates at 100,000 Watts from a 1600 foot tower in Cedar Hill, Texas. Programming is twenty four hours a day of Album Oriented Rock.

I am enclosing a set of coverage maps and a bumper sticker or two for your collection. Thanks again for your interest in our station.

Sincerely,

David Hunn
Chief Engineer
