

FROM ENGINEER'S DESK

KSNY

Dear Wayne:

Yes, you did hear my monthly frequency check! I was pleased to know that somebody besides Austin, tx. was listening. I always wondered how you guys picked up my signal in those far off places. I have letters from the other side of the globe (not in the past ten years though) saying that they heard my checks. I would be interested in listening for other stations regular checks and would appreciate it if you could help me in the equipment side of it and any other information possible. Just a letter to let me know how it is done. Thanks for your trouble.
