Dear Wayne,

Thanks you very much for your reception report of KTEM Radio Station, 1400 KHz, dated September 12, 1988.

We just received a report from Finland last week and continue to be surprised by unusual DX propagation for the AM broadcast band from time to time.

I am familiar with the old R-390 receiver and use an old Super-Pro "CLUNKER" here at the studio for WWV to check our time.

You have obviously been at this broadcast SWL'ing long enough to know your stuff. Again, this happens to be one station that truly appreciates people like yourself. Good listening Wayne.

73,

*Charlie Schlieper*
