

1-30-2008

**Letter of confirmation for the KKMO Dx
Test of January 13th 2008**

After reviewing your enclosed audio clip/description please let this letter serve as confirmation that you did receive the test audio transmitted on KKMO 1360 kilohertz on January 13th 2008 between 12:00 am PST - 12:15 am PST. KKMO broadcasts at 5 kilowatts 24 hours per day non-directional pattern. The tower is a 180 foot shunt excited unipole design. Attached is a coverage map of KKMO's signal.

Sincerely
Monte Passmore
Engineer
