8/18/89

Dear Wayne,

Sorry for the delay in getting this reply back to you. Due to recent changes in procedure and policy at WJMT, and the addition of a new FM station at a different frequency, it has taken this long to get back to you.

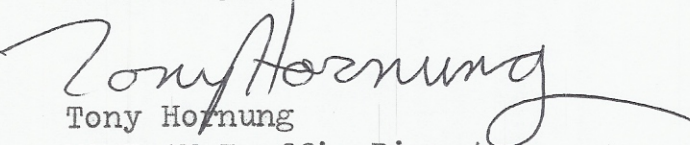

Your reception report jotted down for February 20, 1989 was indeed quite correct. The DJ on the air was our morning man Dan Lee. The Happy Camper promotion was sponsored by our agriculture news network. The song, Wichita Linemans was the one that we played at the time you stated in your reception report. Our telephone exchange is 536, not 526, but you were close.

Kudo's to your equipment for receiving our station in Colorado. I don't know the power of KSSS, but I know the power of WGN would render the WJMT signal unusable on most receivers, especially those of today.

Enclosed, please find a somewhat outdated bumper sticker for WJMT. As stated earlier, our FM sister station which used to be called WJMT FM has changed frequencies from 93.5 to 104.1 and also has changed call letters to WMZK. However, WJMT-AM is still heard at 730khz.

Thanks for listening, Wayne. We enjoy receiving letters, especially me.

Sincerely,

  
Tony Hornung  
WJMT AM Traffic Director
