

11/26/96

Mr. Warren Heinen
4131 S. Andes Way
Aurora, CO. 80013 -3831

Dear Warren;

It's always good to hear from another DX'er. I got my love of radio as a kid... sitting the basement, running up & down the AM dial on a 35 year old Montgomery Wards "Airline" console... now I own my own!

KKTY-AM broadcasts with a power of 1000 watts day, 500 watts night, non-directional. We broadcast with an older-- than-dirt RCA BTA-1R2 transmitter, antenna height is 141'. We simulcast with our sister KKTY-FM on 99.3mhz. Format is Jones's U.S. Country, with a live morning show, lots of local news, high school sports, etc.

Checking our programming logs, we can confirm your reception of KKTY AM on 1470khz between 6:26am and 6:30am, MST on 11/21/96. Thanks for listening!

Sincerely;

Dennis Switzer
Owner/General Manager
KKTY AM/FM
