Mr. Wayne Heinen
1642-C S. Idalia Circle
Aurora, CO 80017

Dear Mr. Heinen;

We are pleased to advise that our transmission records confirm your reception report for 2-13-84 12:02 through 12:10 AM.

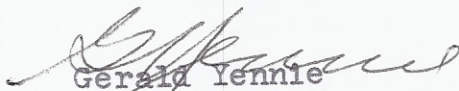

KVOW is a 1000 watt-daytime 250 watt-nighttime station. Our transmitter is a Collins 820D2, antenna is $\frac{1}{4}$ wave located $1\frac{1}{2}$ miles from the studios shared with 50KW KTAK-FM at 603 E. Pershing in Riverton.

We choose not to deviate from our established procedure for frequency measurement-to extend our transmissions expressly for your purposes could be misconstrued as point to point communications-a hassle we would just as soon not get into.

However; it is no secret that we run our frequency test transmission from 12:00 to 12:10 on the second Monday of every month.

Thank you for your interest.

Sincerely,

Gerald Yennie
