Coosa Valley Broadcasting Company

Gadsden, Alabama

April 10, 1947

Mr. Trauner,

The management and engineering staff of this station wish to extend you our most sincere thanks for your report on our test broadcast of 6 April 1947.

We are operating, on unlimited time, into a directional antenna system with an output power of one thousand watts.

Our test activities will continue for a short time from 0100 until 0600 hours daily, as authorized by the Federal Communications Commission.

Your report accurately coincides with our log and we again express our appreciation of the interest you have shown.

Chief Engineer:
John J. Armstrong

"June 1st!"
