J. W. Brauner
Williamsville 21, New York.

Dear Sir:

I am happy to confirm your report of reception of our 1340 KC signal on Oct 1, 1951. You were one of the last to hear it as we changed freq to 580 KC & increased power to 5,000 watts daytime & 500 watts night with a very tight directional pattern. Our freq. check is still scheduled for the same time. 2:00 A to 2:15 A M.S.T. on the first Monday of each Month.

Respectfully

E. E. Steyer
