J.W.Brauner
23 Howard Avenue
Williamsville 21,

Dear Mr. Brauner:

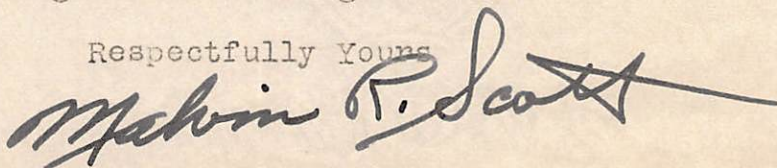

No one is sorrier than I am that I failed to get all of the veris out to the fellows.

To start explaining why sounds too much like making excuses and passing the buck-- To shorten the tale very soon after the reports started coming in We were snowed under with technical grief and quite a few of the letters got out of my hands.

You are surely right we are operating with a pretty tight directional array and I was much surprised to receive as many reports as we did. The fact that several letters appeared from Australia and New Zealand was sa I had expected though since our signal is dumped at an angle of 24ldegrees true.

Having in the passed been a DX fan myself I hope that some day all of the fellows who reported reception of our program will have received veris and yours truly will have finally dug out of the dog-house.

Respectfully Yours

Malvin R. Scott, c.e.,
