Mr. J. W. Brauner,
Williamsville, N. Y.

Dear Mr. Brauner:-

This will acknowledge your fine letter and report of July 9th. and I very glad you picked me up, as I was thinking about you that night so I though I would dedicate some of my old-timers a number or two, your time was very near right with my time as you stated that you did not catch the time as I announce, ~~but~~ ever your were only off $1\frac{1}{2}$ minute and whats that amount to with good friends Hi.

Well we are not getting out as well on account of the QRN, our mail will consist of less then 25 letters a week on the DX programs your is the longest distance we have receive for some time.

I don't know just when KIDW at Lamar, Colorado is coming on, I was to build the Lamar station had the first applicant got a new Station, but this bunch that got the station now belong to the same parties that now have KGIW at Trinidad, Colorado in fact the stations share time on the 1420 KC band which does not increase the state or Zone quota, that's where the people was weak on the first application they were asking for a new station on 1320 KC.

Speaking of Silver-Marshall sets, that is what I use, the speech-amplifiers that I built for the Station uses S*M 220, 227, and 231 transformers, silver-Marshall is the best set that I have used, of course I have not used a Scott or Lincoln, but if you are able to balance up a Silver Marshall when you get it, I don't belived it can be beat for all round service and reception.

Well things are sure dead here, this is a dryland farming and cattle country, and every body is so hardup they don't know which way to turn, I am looking for a New Location in a town not less then eight to ten thousand in Colorado, Wyoming, Idaho or California as I sure am not going to stay in a small town any longer then I have too, I be going broke like the rest around if I do Hi.

Well I am certainly very glad to contract you again, hope that you try me out in August the 6 or 13th if possible, well heres all the luck in the world to you and best 73's I am.

Yours very respectfully,

Engineer and Operator
