Dear Mr. Brauner:

Pardon the delay answering your QSL, but as you will understand it takes a new station a little while to iron out the overlapping emergencies.

We came on the air March 1st and you evidently picked up our sign on.

Your report is interesting in that we were on night pattern at that time and we are pleased to verify your reception.

We are omni-direction by day, using two towers at night for directional purposes.

Very soon we hope to have regular QSL cards and will see you get one.

Thanks for taking the trouble to write us.

Yours very truly,

STATION CJNR,
