A 1000 WATT STATION AT 1410 ON YOUR DIAL

Wm. Courtney Evans, Pres.

Elizabeth Evans, Sec'y.

Phil Adams, Mgr.

April 10, 1949

Mr. J. W. Brauner
23 Howard Ave.
Williamsville 21, New York

Dear Mr. Brauner

We wish to verify your DX report of March 20, 1949. Needless to say we were greatly pleased to know that our signal was received in Williamsville. We have received a great many reports from various sections of the country including the west coast and a few from the West Indies, Canada and other nearby countries.

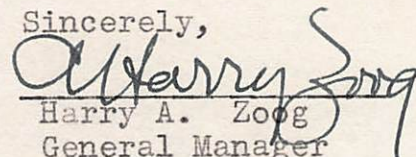

The results of our test program have greatly exceeded our expectations and we are glad to note that we came in strong and clear in Williamsville. We were also glad to know that our quality and tone seemed good and that our carrier sounded free of hum and steady.

I must say you must have been busy for the past few years in order to log such a great number of stations. We wish you lots of luck in your enterprise and are glad we helped you to complete your roster of Delaware stations. Your proof of reception report was absolutely correct and we are glad we played a few of your favorite tunes.

WDOV is evidently in a good location for DX according to the numerous reports we have gotten. The ground in the immediate vicinity of our two hundred foot antenna is usually swampy and the soil around us, consisting mostly of farmland, has fairly good conductivity. And of course Delaware is a peninsula, giving us several salt water paths which no doubt accounts for our reports of daytime reception in Florida and New Orleans.

Thanks again to you and the National Radio Club for your cooperation in compiling the many fine reports we have received. We are hoping very much that you will be able to hear us again soon.

Sincerely,

Harry A. Zoog
General Manager
