TELEF. PARÊDE 85

Parêde, 7th de Feb de 1935

Dear om

On April 7th 1935, from 5 a. m. G.M.T, till 7.30 a. m. G.M.T. (12 p.m. till 2.30 a. m. E.S.T.) we will dedicate a special broadcasing to the members of Newark News Radio, of Newark, U. S. A. Club

Please advise your local radio news papers of this transmission given by C T 1 G L (Portuguese Radio Club - Parêde - Portugal) on the wavelength of 391 metres (1031 Kc/s) aerial power 5 Kw, 100% modulated.

It would be very interesting if the american members of N.N.R.C. could obtain from American and Canadian transmitters that share same or approximate wavelength to close down exactly at midnight, on saturday 6 April, to make possible this experience without interference.

Best 73's es DX

Yours truly
