

WFTL BROADCASTING STATION

Phone 1300

"Serving The Tropical Wonderland"

2700 South Andrews Ave.

FORT LAUDERDALE, FLORIDA

July 16, 1940.

Mr. J. W. Brauner,
17 Spring Street,
Williamsville, N. Y.

Dear Mr. Brauner:

This will verify your report on our test program of Saturday, July 6th, 1940. We certainly wish to thank you for this report and for the interest you have shown in this station.

This station has been on the air since December 4th, 1939. We are completely Western Electric equipped. The xmitter is a 310-B feeding a Blaw-Knox 175 foot tower. This is a perfect quarter-wave antenna for this frequency. The ground is standard Bell Lab system using 120 radials a quarter wave long with an 8 foot ground rod at the end of each radial. On a circle 15% of the tower height away from the tower base there is a circle of 4 inch copper strip to which each radial is soldered. Inside the circle mentioned above there is a radial run to the tower base between each of the long radials.

Our regular test programs have been changed now to the first Wednesday of each month, from 3:00 to 3:15 A.M. EST. The next regular test program will be broadcast on August 7th, at this time. We would be very glad to hear from you again.

Again thanking you for your interesting report and with best wishes,

Sincerely,

WFTL BROADCASTING STATION,

FRANCIS G. CARROLL,
Chief Engineer.
