Williamsville, 21,  
New York

Dear Sir;

Thank you for your report on the reception of our station on April 1st 1948. The transmissions you heard were the first test transmissions made by this station, and it was with a great deal of interest that I received your report.

Our station log shows that we were conducting equipment test transmissions between 4:30 AM and 5:00 AM the morning of April 1st as you reported and I am glad to verify your reception of the station on that date. At the time WOBS was operating on it's assigned frequency of 1360 kilocycles with a power of 1,000 watts.

Thank you for your report and your good wishes.

Very truly yours,

*William F. Askew*
