Dear Mr. Brauner:

Thank you very much for your kind letter of the tenth.

I have been working on the modulation for the past several months to get as much as possible on the carrier and your letter makes me feel as though it has helped somewhat. We are using a "limiter" with about ten to fifteen db compression, and are peaking 100% modulation.

We are fortunate now also in that a stream running near our antenna has been dammed up with the result that there is about a foot of water in the vicinity for several hundred feet which seems to be helping also.

Again, thank you very much for your letter.
