10 August 46

J.W. Brauner
Williamsville, New York

Dear Sir: This is to verify your greatly appreciated reception report of August 8, 1946. We are happy to hear we came in so well. Incidentally you heard our first broadcast.

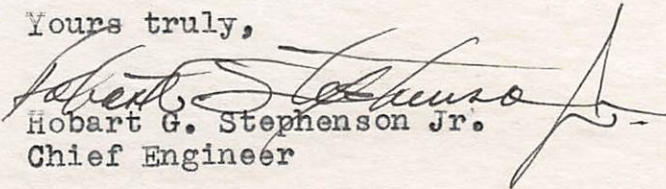

We are using a Gates BC-1E transmitter working into a 220' Windcharger tower.

Your right, women announcers are rare on tests, however we are very proud of this girl and believe that she has an outstanding voice and ad-lib ability. She is our program director and we felt it only right to give her first shot at announcing on our test.

This is a poorly written letter but the secretary has been too busy to handle all correspondence so I am verifying all reports personally. I'm not a typist.

Thanks again for the report.

Yours truly,

Hobart G. Stephenson Jr.
Chief Engineer
