Dear Mr. Brauner,

Thank you for the reception report. Your report is as near exact as can be expected for the channel you were monitoring.

More than likely you have encountered a fair signal from XERF in Villa Acuna, Mexico on 15. They are the limiting factor on our extracurricular activities, having something like 150,000 watts to raise havoc. All in all, we are pretty proud of the output of our 250, though, and have had reasonable reports from the area.

Thanks again for your report.

*Donald* Sincerely yours,  
*Head / Charlotte Whitson*
