This letter is to verify reception of WRSW, ~~WRSW-FM~~, by you on 12/12/51 at 2:45 am. (CST)

WRSW operates on 1480 Kc. with an authorized radiated power of 500 watts, using two 287' guyed towers and one 287' self supporting tower in a three tower directional antenna array, and a Collins model 20V transmitter.

WRSW-FM operates on 103.7 Mc., with an effective radiated power of 34,000 watts, using an eight bay Collins antenna mounted along side the uppermost portion of a Truscon 287' self supporting tower. The transmitter is a Westinghouse type FM-3 running at 3,000 watts output.

We thank you very much for your report of reception. It is greatly appreciated.

*Fred Gresso*  
WRSW engineering staff
