

K W B W

THE NATION'S CENTER BROADCASTING CO.
INCORPORATED

Hutchinson, Kansas

February 14-1942

Dear Sir;

We wish to verify your reception of our station, K W B W, operating on the frequency of 1450 kc. We have increased our ground system, having at present three and one-half miles of wire in the ground and have also added forty feet to the height of our tower.

We are always glad to receive reports from our DX listeners and hope that this letter will take the place of a verification card, we are out of cards at present.

Sincerely,

Millard H. Clary

Millard H. Clary,

Chief Engineer.
