Mr. J. W. Brauner
23 Howard Ave.
Williamsville 21, New York

Dear J. W.:

Thank very much for your nice report. Was glad to learn that WAIN gets up in your locality every once in a while. Your report was very much in detail and upon comparison with our log we found everything almost in parallel.

I am program director here at WAIN and was the fellow that you heard doing the informal talking on the equip. & freq. check. Ed Healy was working with me and was in charge of all the tech. equip. Ed & I have just finished remodeling a new studio in the transmitter building and we were trying out some of the hand-me-down equipment. We didn't think it worked out too good due to the "bugs" but evidently, from your report and various others we must have been a little better than we expected.

WAIN has only been on the air about three months and has been operating very well. Our frequency check is made with RCA on the last monday of each month. We make the check at approximately 2:15 CST. Of course, we are usually on the air long before the scheduled freq. check. We would be glad to hear from you concerning any of these checks.

May we say thanks again for your correct logging info and may we hear from you again?

Yours very truly,

Rex Osborne
