Dear Sir:

This is to verify your reception report of WBVL  
on November 28, 1955.

Our transmitter is Western Electric utilizing a  
High Efficiency Class B Amplifier. The radiating  
system consists of a  $\frac{1}{4}$  wave vertical radiator  
series fed by a pressurized coaxial line. A 48'  
x 48' copper ground screen is used in conjunction  
with 120 radials 260' long.

We sincerely appreciate your report.

Yours sincerely,

RADIONSTATION WBVL
