J. W. Brauner.  
23 Howard Ave.  
Williamsville 21, New York.

Dear Mr. Brauner:

I received your letter in last weeks <sup>mail</sup>. I was very pleased to hear from you. Thanks a million for taking so much interest in our new station.

We are using Collins 300G Transmitter, with 6L6 Buffer, 807 IPA amplifier driving a pair of 810's. Feeding 235 feet transmission line into a Collins tuning unit and radiating with a Blaw-Knox 150' tower.

Your report is in accordance with our Station Log. Thanks again for your response to our Equipment test and when down this way please drop in to see us.

Good luck, and good radioing for many years to come.

Yours truly,

*Tom Baldwin*
