Williamsville 21, N. Y.

Dear Mr. Brauner:

Received your DX report of November 8th., and appreciate your interest in our station. This is to verify that report as correct, and to give you a few highlights about KLOU.

We have a two-element directional antenna system with major lobes to the east, west, and south, and a minor lobe to the north. We use a composite transmitter and a Western Electric 25-B control console.

KLOU began operation last May 17th., with Mr. H. V. Anderson, of the engineering firm of Anderson & Merryman, as manager. On the first of this month we joined the Columbia Broadcasting System.

To date, our most distant DX reports have come from Washington state and Vermont, in the states; and four reports have come from New Zealand.

Your report was especially interesting, and I hope this letter will serve as sufficient verification for you.

Again let me thank you for your interest and report.

Very truly yours

Ben Segrest
